

Serial No.: 09/738,801

Attorney Docket No.: 2000P09081US

IN THE CLAIMS:

This listing of the claims will replace all prior versions and listings of the claims in the application:

1. (Currently Amended) A method, comprising:
playing a video on a video input device;
receiving an activate signal;
digitizing and storing at least a portion of said video;
receiving a deactivate signal;
compressing said at least a portion of said video;
storing said at least a portion of said video;
launching an e-mail application responsive to said deactivate signal; and
automatically accessing said at least a portion from memory and attaching said at least a portion of said video as an attachment to an e-mail message without user interaction.
2. (Original) A method in accordance with claim 1, wherein said compressing further comprises a user selecting a compression method.
3. (Original) A method in accordance with claim 1, wherein said receiving a deactivate signal is responsive to a timeout of a timer.
4. (Currently Amended) A telecommunications device, comprising:
a video input device for generating video images;
a monitor for displaying said video images; and
a Web Access device including an e-mail module, said Web Access device adapted to receive video images from said video input device and automatically open an e-mail compose window and attach, without user interaction, said video images to [an] the e-mail compose window responsive to a video e-mail command signal for transmission as an attached e-mail file.

Serial No.: 09/738,801

Attorney Docket No.: 2000P09081US

5. (Original) A telecommunications device in accordance with claim 4, said video e-mail command signal comprising a signal from a switch associated with said video input device.

6. (Original) A telecommunications device in accordance with claim 4, said video e-mail command signal comprising a signal from a remote control switch associated with said video input device.

7. (Original) A telecommunications device in accordance with claim 4, said video e-mail command signal comprising a signal from a graphical user interface.

8. (Original) A telecommunications device according to claim 4, wherein said monitor is a television screen.

9. (Original) A telecommunications device according to claim 8, wherein said Web Access Device comprises a personal computer.

10. (Currently Amended) A method, comprising:
providing a video input device for generating video images;
providing a monitor for displaying said video images; and
providing a Web Access device including an e-mail module, said Web Access device adapted to receive video images from said video input device and automatically open an e-mail compose window and attach, without user interaction, said video images to [an] the e-mail compose window responsive to a video e-mail command signal for transmission as an attached e-mail file.

11. (Original) A method in accordance with claim 10, said video e-mail command signal comprising a signal from a switch associated with said video input device.

Serial No.: 09/738,801

Attorney Docket No.: 2000P09081US

12. (Original) A method in accordance with claim 10, said video e-mail command signal comprising a signal from a remote control.

13. (Original) A telecommunications device in accordance with claim 10, said video e-mail command signal comprising a signal from a button associated with a graphical user interface.

14. (Original) A method in accordance with claim 10, wherein said monitor is a television screen.

15. (Original) A method in accordance with claim 10, wherein said Web Access Device comprises a personal computer.

16. (Currently Amended) A telecommunications system, comprising:
a local area network; and
a video e-mail system coupled to said local area network, the video e-mail system including:
a video input device for generating video images;
a monitor for displaying said video images; and
a Web Access device including an e-mail module, said Web Access device adapted to receive video images from said video input device and automatically open an e-mail compose window and attach, without user interaction, said video images to [an] the e-mail compose window responsive to a video e-mail command signal for transmission as an attached e-mail file.

17. (Original) A telecommunications device in accordance with claim 16, wherein said e-mail comprises an e-mail for another entity on said LAN.

18. (Previously Presented) A telecommunications device in accordance with claim 16, wherein said e-mail comprises an e-mail for an entity external to said LAN.
